DETAILED ACTION

1. All prior rejections based on 35 USC 102 are withdrawn.
2. All prior rejections based on Ikeda et al. are withdrawn.
3. All other rejections under 35 USC 103 are maintained.

Claim Rejections - 35 USC § 103

4. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
5. Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Yamamoto et al. in view of Yarusso et al. ('249).

The basis for this rejection is found in the prior office action, where the disclosure of a release layer (applicant's claim 8) in Yamamoto et al. is explained. Yarusso et al. ('249) is applied here as it was applied to Yamamoto et al. regarding the original claim 3 in the prior office action.

Response to Arguments

6. Applicant's arguments filed June 19, 2002 have been fully considered but they are not persuasive.

Art Unit: 1711

7. In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, The combination of Yarusso et al. and Yamamoto et al. in order to provide a tape with an oriented backing is motivated by the disclosure in Yarusso et al. that oriented thermoplastics are known in the art as suitable backing for tapes and by the applicant's admission that such substrates have high tensile strength (page 8, line 2 of the specification). Therefore the motivation for making the tape with an oriented thermoplastic is not only that such substrates are known in the art, but also that such a tape will have improved mechanical properties.

The applicant's argument that improved mechanical properties are not necessary in the invention of Yamamoto et al. is also not persuasive because the tape in Yamamoto et al. is used in applications other than the semiconductor wafer-cutting application that the applicant cites. Another application for the tape in Yamamoto et al. is the protection of semiconductor wafers (column 7, lines 52-53), where a tape's improved mechanical strength would be beneficial, further adding to the motivation for making the tape using an oriented thermoplastic backing.

The definition of the tape of the current invention as a packaging tape does not distinguish it from the prior art. The tapes in the references, specifically in Yamamoto et al., may inherently act as a packaging tape, and that intended use does not patentably distinguish the reference from the present application.

8. In response to applicant's argument that Yamamoto et al. in view of Yarusso et al. is nonanalogous art, it has been held that a prior art reference must either be in the field of applicant's endeavor or, if not, then be reasonably pertinent to the particular problem with which the applicant was concerned, in order to be relied upon as a basis for rejection of the claimed invention. See *In re Oetiker*, 977 F.2d 1443, 24 USPQ2d 1443 (Fed. Cir. 1992). In this case, both references are in the field of applicant's endeavor, namely in the adhesive tape art. Further, both references deal with pressure-sensitive adhesives and are therefore analogous art.

Conclusion

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
